REST endpoint  
[Direct Line Protocol](#)

Conversational and  
business logic

Canvas aware

Context  
sensitive

# What is the bot framework?

## What?

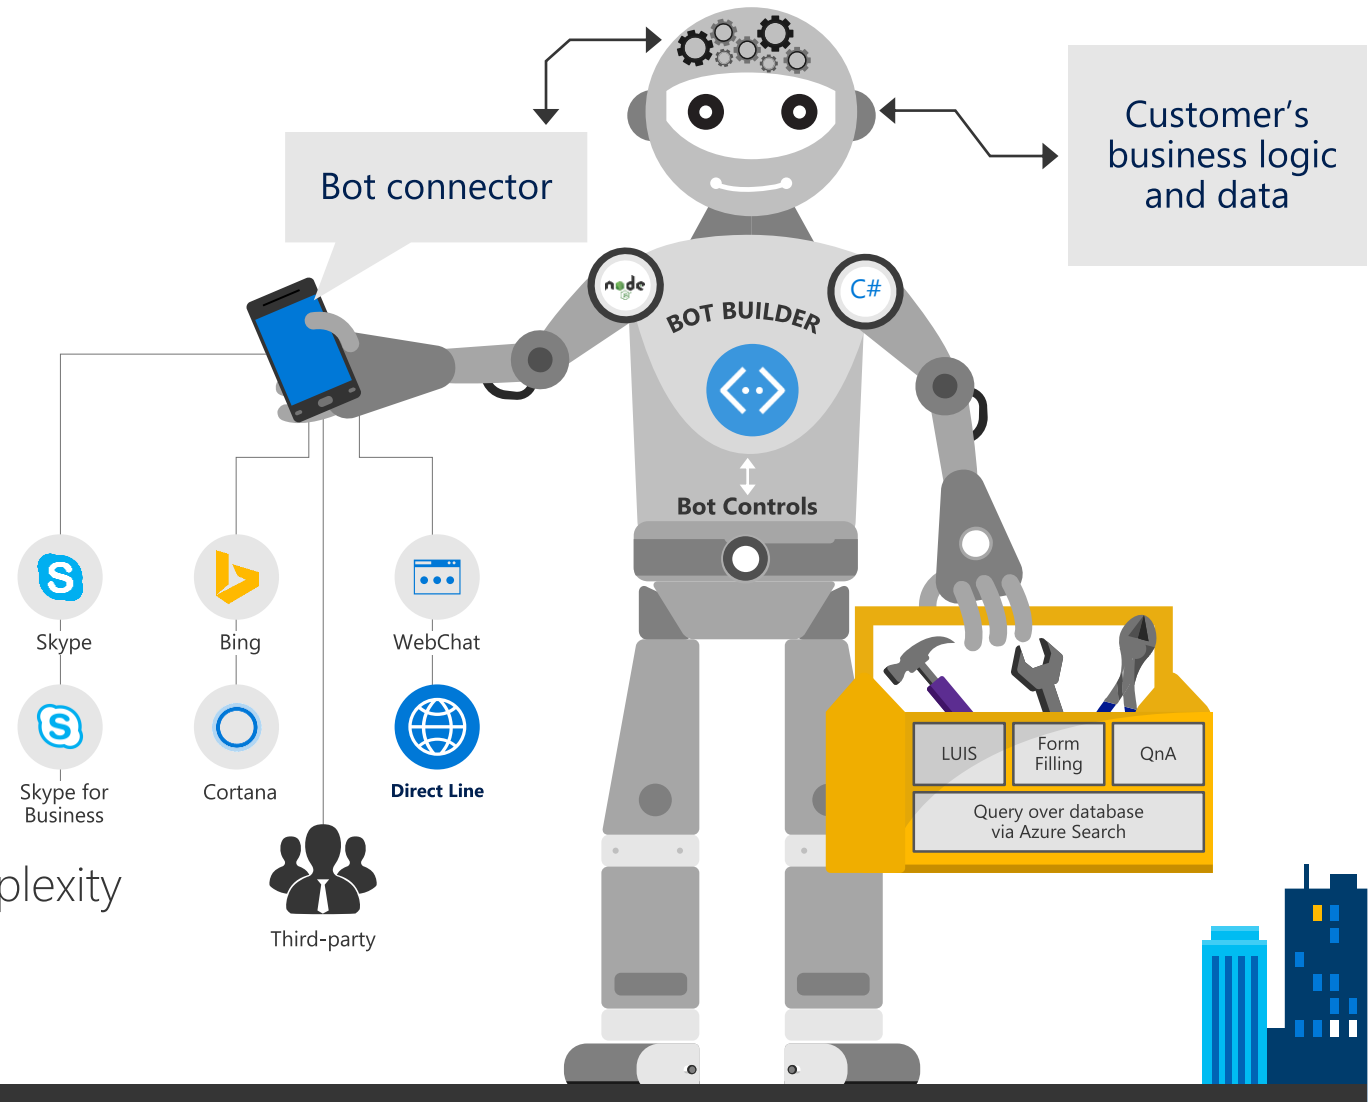

- Tools for building REST websites
- Services to enrich
- Mechanisms for receive events
- Data to debug and tools to analyze

## Why?

- Implements standard protocols
- Modeling conversations is hard; tools help!
- UI across multiple canvases is hard; cards rock!
- Language understanding is hard
- Common and well understood patterns

## Goals

- Start simple; add complexity; no dead-ends
- Bot adapts to the user, based on context
- Composable and intelligent controls to manage complexity

# Highlights

---

I M P R O V E M E N T S   E V E R Y W H E R E !

## Bot builder

- SDK updates
  - Speech support
  - Improved dialog tools
  - Debugging improvements
  - Channel inspector
- Improved tooling

## Platform

- New channels
  - Cortana
  - Bing
  - Skype for Business
- Adaptive cards
- Speech support
- Payments

## Intelligence

- Analytics
- Bot controls
- Speech support
- Cognitive services

# New docs!

---

## # 1 REQUESTED FEATURE

Comprehensive

---

Scenario-based

---

Well organized  
and discoverable

Bot design

---

Patterns and practices

---

Samples

Searchable

---

Integrated with APIs

---

Easy to read

# Speech

---

## DEEP INTEGRATION ACROSS THE BOT FRAMEWORK

### SPEECH IN PROTOCOLS

DirectLine support

---

WebChat control

---

Cortana

### SPEECH IN SDKS

SSML

---

Speech friendly prompts

---

Conversation management

### SPEECH IN LUIS

Modeled conversations

---

Common model (Cortana,  
Bing speech, custom  
speech recognition)

# LUIS

---

## L A N G U A G E   U N D E R S T A N D I N G

### Top requested features

- Production staging and versioning
- More languages (Dutch, Korean, dialects)
- Increased intent and entity limits
- 25 customizable prebuilt domains

### More new features

- Lists
- Improved recognizers(\*)
- Semantic dictionaries
- Spell checking

(\*) Recognizers are open-sourced

# LUIS

---

## L A N G U A G E   U N D E R S T A N D I N G

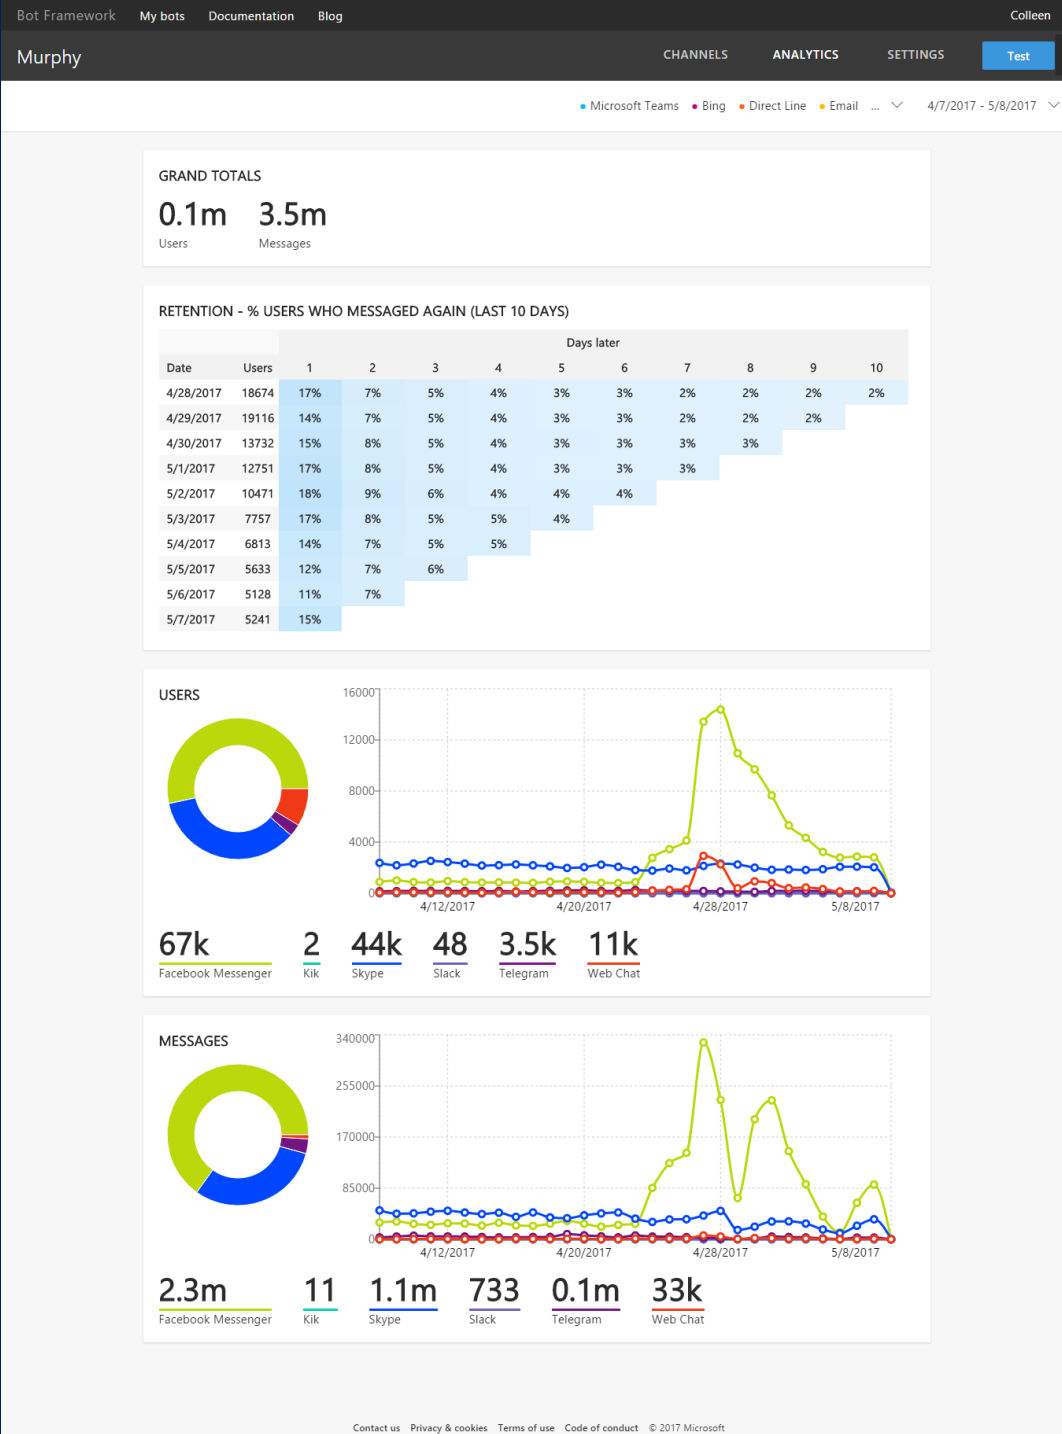

### Pre-built domains

- Predefined packages
- Bootstrap model creation
- Customizable!

### Examples of pre-built domains

- |               |                   |
|---------------|-------------------|
| ○ Sports      | ○ Entertainment   |
| ○ Weather     | ○ Fitness         |
| ○ Stock       | ○ Home automation |
| ○ Contacts    | ○ Music           |
| ○ Calendar    | ○ Translation     |
| ○ Restaurants | ○ Movie tickets   |

# Azure bot service v.Next

---

S N E A K P E E K

## **“One stop shop for building bots”**

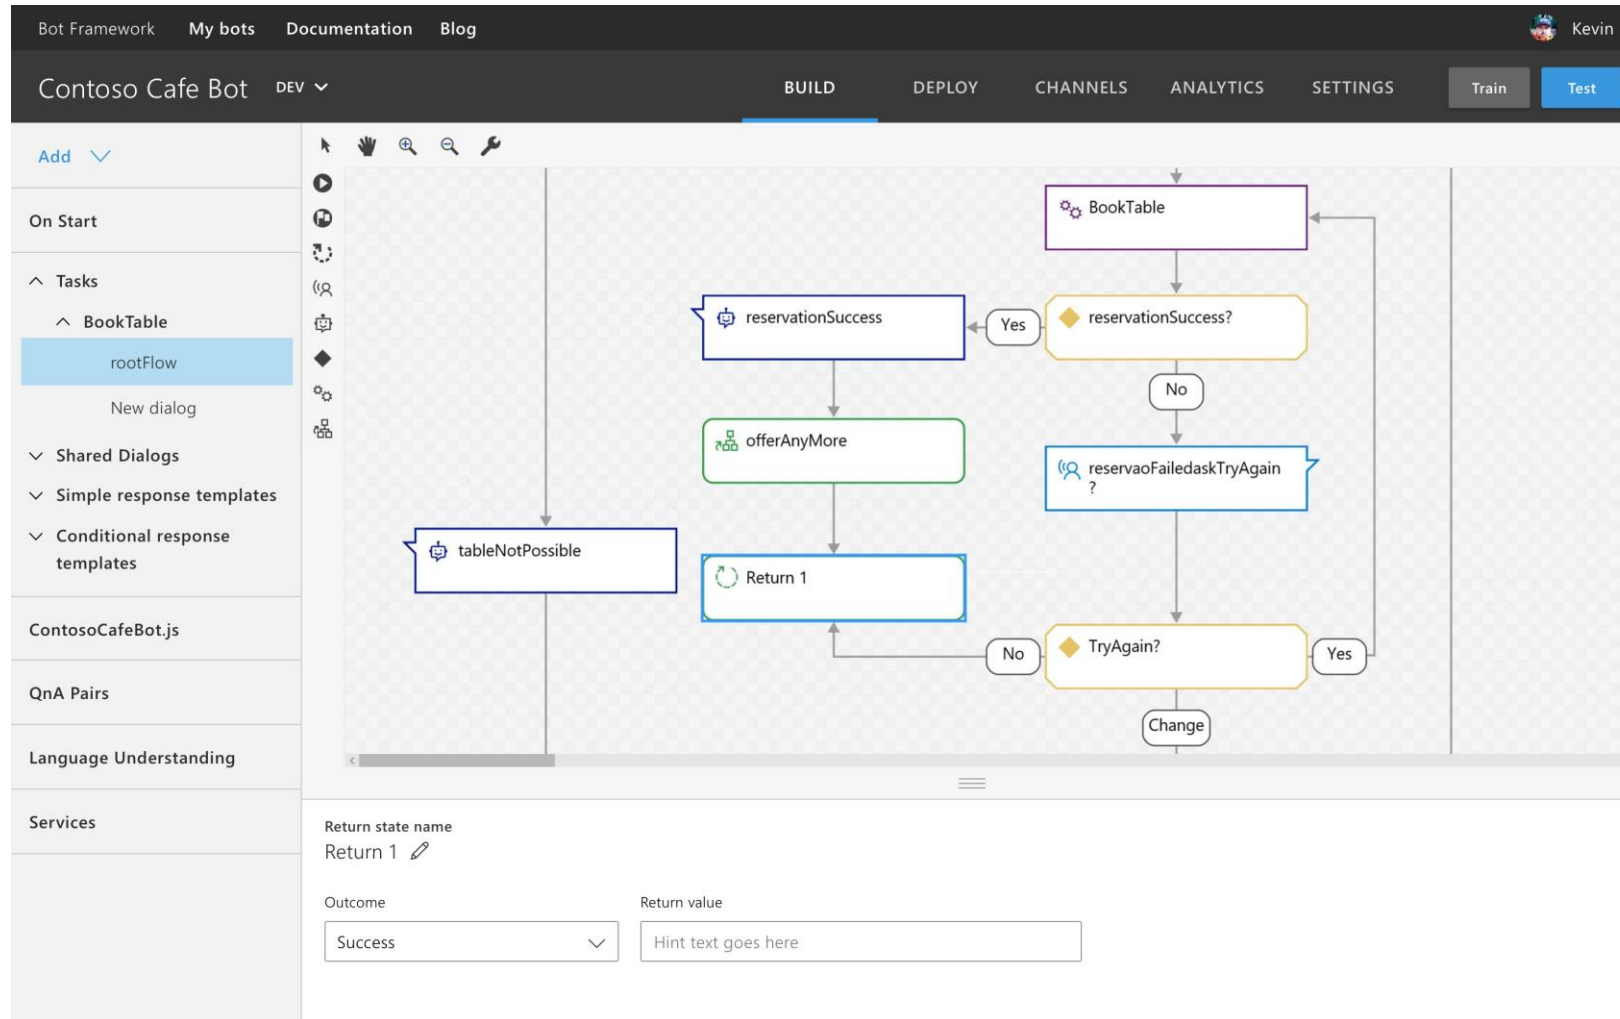

- Fully Azure integrated
- Conversational vs. business logic
- Richly tooled
- Design; code; deploy; manage; analyze

## **Highlights**

- Data stays in a user's subscription
- Improved perf via colocation
  - Bot + functions + LUIS runtime
- SDK unification
- Componentization and reuse

# Azure bot service v.Next

# Bot framework roadmap 2017

# Questions?

Contact

# What is the bot framework?

## Build and connect intelligent bots

The bot framework provides tools and resources for designing, building, deploying, and managing bots

## Network of Microsoft customers

Bots connect to Microsoft properties, such as Cortana, LinkedIn, Skype, and Office 365

# Bot example

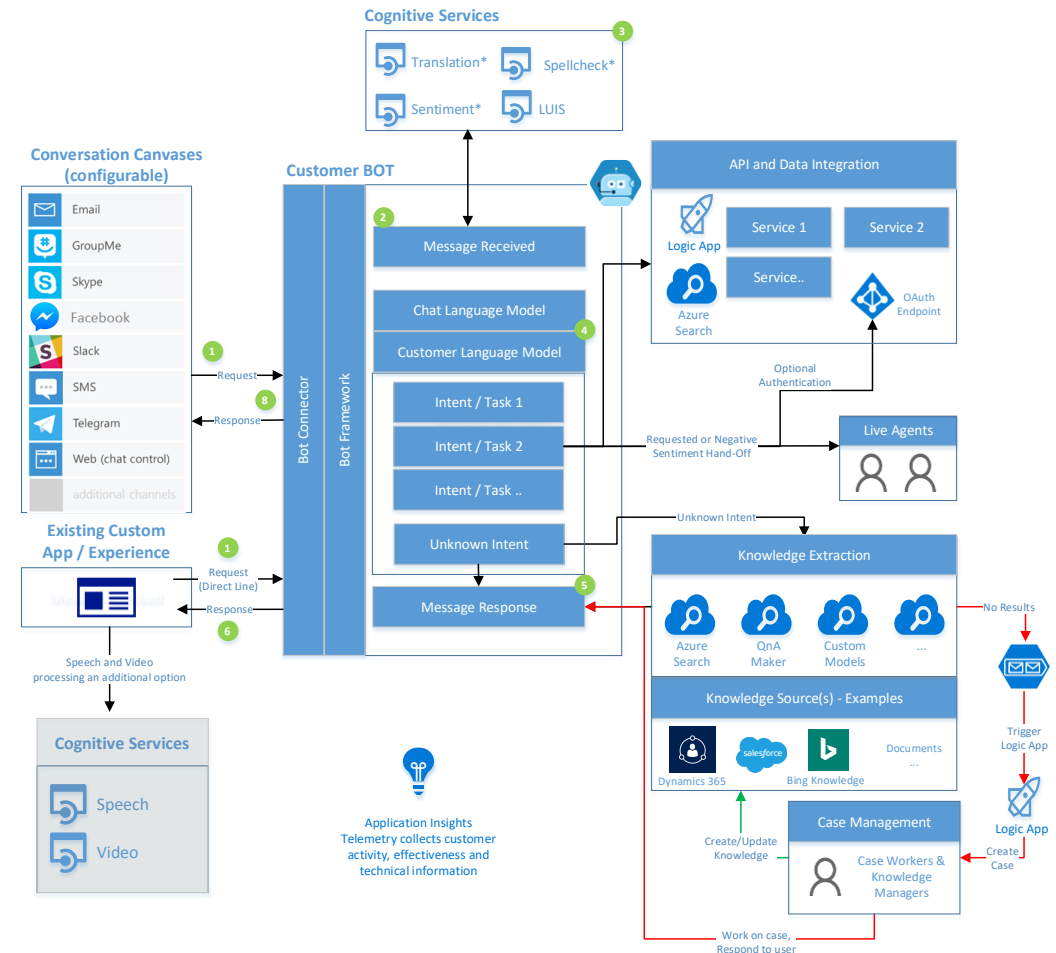

## Azure Services integration via SMSG

Task completion and general knowledge are fundamental to every Bot we deliver

Language understanding, translation, spellcheck, and sentiment cognitive services are key

Dynamics 365 Knowledgebase provides a comprehensive and agile way to provide general knowledge to the Bot and tooling to the customer to manage knowledge and feedback and to manage support cases

Application insights provides highly impactful insight into technical and end user value

# Bot framework surface area

## Bot builder

Tools for conversational modeling, bot memory, and integration of business logic

## Core platform

Provide developer broad access to Microsoft customers via Microsoft properties

## AI and resources

Democratization of AI resources such as language understanding, QnA Maker, and other cognitive services

# Payment card schema

Combination of bot framework and [W3C Payment Request standard](#)

Familiar to bot devs,  
familiar to commerce devs
